**CROSS TOWN**

Protect'Air

Road and Trekking  
26" & 700"

"Whether you're riding in town or along small country lanes, punctures remain your number one enemy! Bits of broken glass, thorns, screws, nails... any one of these hazards can quickly spoil your ride or lead to delays. To reduce the risk of punctures, HUTCHINSON has designed a range of highly resistant tyres using the Protect'Air concept. This technology provides a real barrier to sharp objects, while enhancing comfort and high-level performance. For extra resistance and comfort, choose the **Protect'Air Plus** concept!"

Reflective sidewalls

**Reflex**

The **REFLEX** technology meets a real need for city cyclists, in other words, visibility! Tyres that incorporate this technology feature reflective side bands so that car drivers can see you more easily, thereby enhancing your safety.
