« I love them ! »
Tom Boonen (2006)

« We can ride at low pressure without
worrying about punctures;
it's a real advantage. »
Martial Gayant, Team La Française Des Jeux (2008)

« a truly agreeable "velvety-smooth"
comfort »
Vélo 101 (may 2009)

EASY TO INSTALL

- no inner tubes
- easily mounted by hand or with a tyre lever
Hutchinson Stick Air

HIGH PERFORMANCE

- no inner tubes adds up to maximum performance
- lighter than the traditional tyre and inner tube combination

COMFORT

- lower air pressure than traditional tyres (~7 bars)
- enhanced grip
- less vibration

NO MORE PUNCTURES THROUGH PINCHING

- no inner tubes, so no punctures due to pinching!
- compatible with Hutchinson Protect'Air Max preventative liquid

SAFETY

- thanks to the carbon beads, there's no danger of it rolling off the rim
- in the event of a puncture, you can mount a tyre with an inner tube
